

Fund Update

For the quarter ended 31 March 2017

- **Russell Investment Funds**
- **Russell Investments Hedged Global Shares Fund**

This fund update was first made publicly available on: 28 April 2017

What is the purpose of this update?

This document tells you how the Russell Investments Hedged Global Shares Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Implemented Investment Solutions Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Objective: to provide a total return, before costs and tax, higher than the Russell Global Large Cap NZ Hedged – Net Index over the long term (3 years plus).

Strategy: the underlying investment exposure is predominantly to a broad range of international shares listed on stock exchanges in developed markets as well as emerging international markets. Derivatives may be used to obtain or reduce exposure to securities and markets, to implement investment strategies and to manage risk. The Fund targets a position of being fully hedged back to New Zealand Dollars. Due to active currency management by the underlying managers, there will generally be some foreign currency exposure.

Total value of the fund	\$NZ 55,323,367
The date the fund started	24 July 2012

What are the risks of investing?

Risk indicator for the Russell Investments Hedged Global Shares Fund.¹

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on a combination of actual and market index returns data for 5 years to 31 March 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year ²
Annual return (after deductions for charges and tax)	17.84%
Annual return (after deductions for charges but before tax)	19.02%
Market index annual return (reflects no deduction for charges and tax)	18.82%

The market index return is the Russell Global Large Cap NZ Hedged – Net Index return. Additional information about the market index is available on the offer register at www.companiesoffice.govt.nz/disclose.

Annual Return Graph³

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2017.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Russell Investments Hedged Global Shares Fund are charged fund charges. In the year to 31 March 2016 these were:

	% of net asset value
Total fund charges	1.56%
Which are made up of -	
Total management and administration charges	1.56%
Including -	
Manager's basic fee (including GST)	1.32%
Other management and administration charges (including GST)	0.24%

The 'other management and administration charges' include fees and costs charged in underlying funds. The amount of fees and costs charged in underlying funds has been estimated. See the Notes at the end of this fund update for more information about this estimate.⁴

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Russell Investment Funds on the offer register at www.companiesoffice.govt.nz/disclose for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony received a return after fund charges were deducted of \$1,902 (that is 19.02% of his initial \$10,000). This gives Anthony a total return after tax of \$1,784 for the year.

Notes

- ¹ A combination of actual Fund returns and market index returns have been used to determine the risk indicator as the Fund has not been operating for the required five years. The risk indicator may therefore provide a less reliable indicator of the Fund's future volatility. Market index returns have been used for the period to 31 July 2012.
- ² These returns are for the year to 31 March 2017.
- ³ The bar chart shows fund returns after deducting fees and tax. Tax is deducted at the highest Prescribed Investor Rate of 28%. However, the market index returns are shown before deducting fees and tax.
- ⁴ We have taken the underlying fund's fees and costs data from the underlying fund's financial statements which are for the year to 30 June 2016. In this fund update, we have estimated the underlying fund's fees and costs for the year to 31 March 2016 on the assumption they will be the same as that disclosed in those financial statements.
